SUMMARY

MCA graduate with a foundation in data science, artificial intelligence and cyber security, now working as an IT Trainee at Sashma Group. Primary developer of HSE, a full-stack platform I own end to end, including its ongoing data regularisation. Looking to grow in a role that combines careful data work with application development.

EXPERIENCE

IT Trainee, Sashma Group, Chennai

Sep 2026 – Present

- Promoted from intern after three months to take on development work independently.
- Primary owner of HSE, handling the full stack from the user interface through to the database.
- Maintain data regularisation across the platform so records stay consistent and reliable.

IT Intern, Sashma Group, Chennai

Jul 2026 – Sep 2026

- Supported day-to-day IT operations across the business.
- Took on development tasks that led to the HSE platform and a move into a trainee role.

IT Support Intern, DP World, Chennai

Dec 2023 – Jan 2024

- Supported daily tech operations by fixing system issues, checking device health and keeping workstations running for teams across the logistics site.
- Troubleshoot network and software problems, documented common fixes and helped improve response times for internal support requests.

PROJECTS

HSE (Sashma Group) — Full-stack platform owned end to end as primary developer, from the interface through to the database, with ongoing data regularisation keeping its records consistent.

File Sorter (Python, Google Antigravity) — Command-line tool that sorts a folder by file type, creating a folder per extension and moving or copying each file into it.

Waste Detection (CNN, YOLO) — Detection system built on CNN models including YOLO that classifies waste as biodegradable or non-biodegradable.

ASL Sign Language Detection (CNN) — CNN-based model that identifies American Sign Language hand signs from images.

Handwritten Digit Recognition (CNN) — CNN classifier for handwritten digit images, with data pre-processing and performance evaluation.

Platformer Game (Pygame) — Platform game with six levels and an interactive level selection screen.

TECHNICAL SKILLS

Programming & Development: Python, full-stack development, scripting and automation, Google Antigravity, Pygame

Data & Databases: SQL, MySQL, MongoDB, database management, data regularisation, data analysis and aggregation

AI & Machine Learning: Convolutional neural networks, YOLO object detection, image classification, data pre-processing, model evaluation

IT & Security: Ethical hacking, network troubleshooting, system and device health, technical documentation

EDUCATION

Master of Computer Applications — SRM Institute of Science and Technology, Ramapuram, Chennai

2024 – 2026 | CGPA 9.0

Bachelor of Computer Applications — Loyola College (Autonomous), Chennai

2021 – 2024 | CGPA 7.61

Higher Secondary, Science Stream — Velankanni Matriculation Higher Secondary School, Chennai

2019 – 2021 | 88.68%

CERTIFICATIONS

Introduction to MongoDB, MongoDB (Aug 2024) • Database Management System, IIT Kharagpur (Jul – Sep 2024) • Programming in Python, Internshala (Aug 2023) • Ethical Hacking, Internshala (Sep 2022)

ACHIEVEMENTS & LEADERSHIP

2nd Place, Paper Presentation — ENIAC 2k24, inter-college competition, Loyola College (Autonomous), 2024.

Assistant Leader, Women Empowerment Team — Loyola College (Autonomous), Jun 2022 – Mar 2023. Ran awareness events in and around the college on health and on government laws that benefit women, collaborating with local government bodies on events promoting financial independence.
